

Mendeley konta izveide

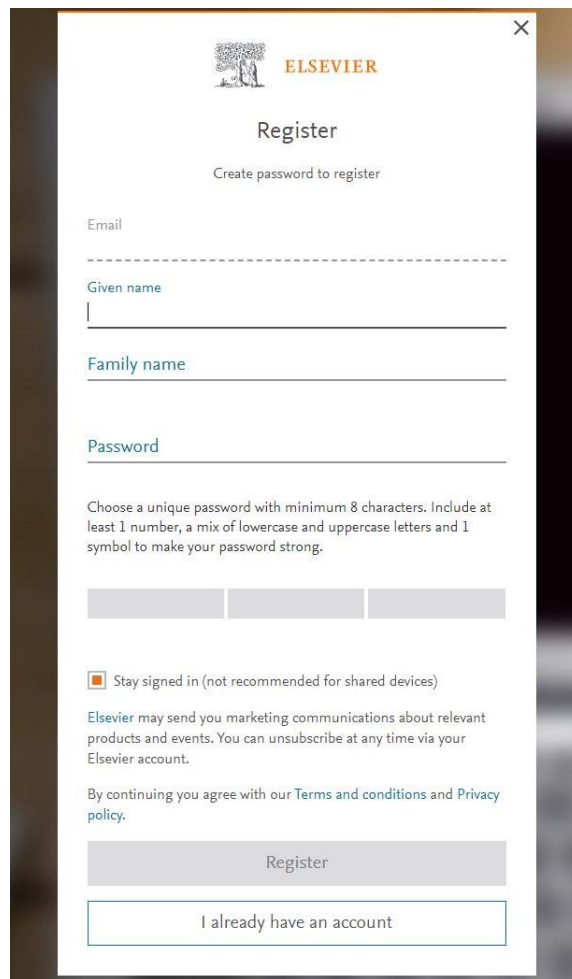

1. Atveriet saiti <https://www.mendeley.com/>
2. Lai izveidotu savu ELSEVIER kontu, klikšķiniet uz **“Create account”**. Tā kā Mendeley ir ELSEVIER produkts, tad tajā var reģistrēties ar to pašu kontu, ar kuru pieslēdzas Scopus un Science Direct. Tad jāklikšķina uz **“Sign In”**.

3. Ievadiet e-pastu, kuru izmantosiet, un klikšķiniet uz **“Continue”**.

4. Pēc tam ievadiet savu vārdu, uzvārdu un izveidojiet paroli. Pēc tam klikšķiniet uz “Register”.

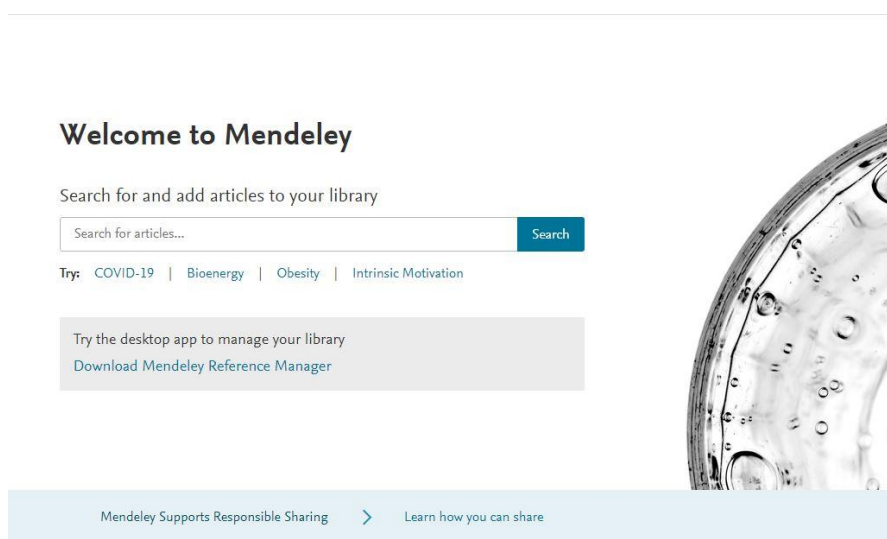

The image shows a screenshot of the Elsevier registration page. At the top left is the Elsevier logo, and at the top right is a close button (X). The main heading is "Register" with the subtext "Create password to register". Below this are several input fields: "Email", "Given name", and "Family name". The "Password" field is followed by a detailed instruction: "Choose a unique password with minimum 8 characters. Include at least 1 number, a mix of lowercase and uppercase letters and 1 symbol to make your password strong." Below the password field are three small grey boxes representing character requirements. There is a checkbox labeled "Stay signed in (not recommended for shared devices)". A paragraph of text explains that Elsevier may send marketing communications and that users can unsubscribe at any time. Below this is a line of text: "By continuing you agree with our Terms and conditions and Privacy policy." At the bottom, there are two buttons: a grey "Register" button and a white button with a black border labeled "I already have an account".

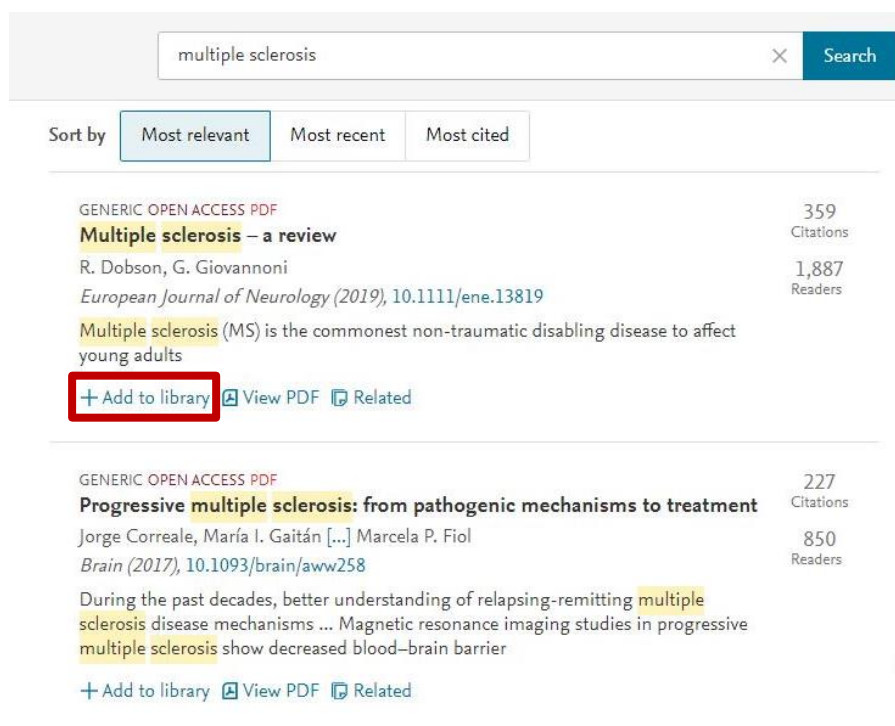

5. Izveidotajā kontā var pievienot un saglabāt nepieciešamās atsauces.

Mendeley atsauču eksportēšana

1. Visērtāk meklēt un eksportēt atsauces ir pašā Mendeley meklētājā.

2. Ieraksta nepieciešamos atslēgas vārdus meklētājā un izvēlas, kurus dokumentu veidus, pievienot savā bibliotēkā, ar pievienošanas pogu "Add to library".

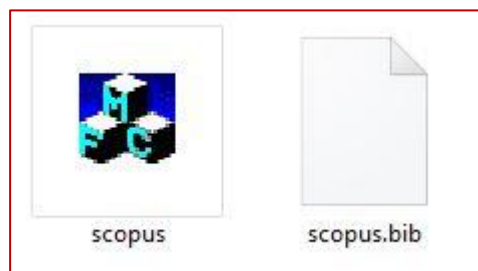

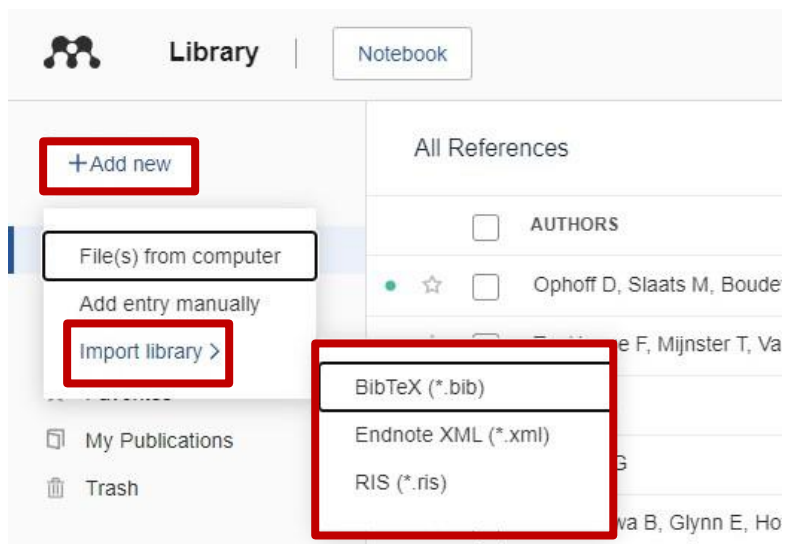

3. Science Direct datubāzē pie izvēlētās atsauces klikšķina “Add to Mendeley”.

The screenshot shows the top portion of a ScienceDirect article page. On the left is the Elsevier logo. In the center, the journal title 'Sleep Medicine' is displayed, along with the volume and issue information: 'Volume 95, July 2022, Pages 9-15'. On the right is a small thumbnail of the journal cover. Below this is the article title 'Markers of ventricular repolarization and overall mortality in sleep disordered breathing'. The authors' names are listed below the title. A 'Show more' link is visible. At the bottom of the article information section, there are three buttons: '+ Add to Mendeley' (highlighted with a red box), 'Share', and 'Cite'. Below the buttons is the DOI link: 'https://doi.org/10.1016/j.sleep.2022.04.016' and a link to 'Get rights and content'.

4. Savukārt Scopus datubāzē izvēlas pogu “Export”, pēc tam “Mendeley”.

The screenshot shows a search results page in Scopus. The main content area contains a list of authors' names, some of which are partially obscured by a grey rectangular box. This box contains a dropdown menu with the following options: 'File types', 'CSV', 'RIS format', 'BibTeX', 'Plain text', 'Reference managers', 'Mendeley' (highlighted with a red box), 'ProQuest RefWorks', 'Platforms', and 'SciVal'. Below the main content area, there is a 'Full text options' dropdown menu and an 'Export' button (highlighted with a red box) with an upward-pointing arrow.

5. Lai eksportētu atsauces no citām datubāzēm, klikšķina “**Export**”, tad izvēlas formātu, kādā lejupielādēs nepieciešamo atsauci. Mendeley rīkam derēs šādi formāti: **BibTeX (*.bib)**; **Endnote XML (*.xml)**; **RIS (*.ris)**.
6. Kad atsauce lejupielādēta, tad savā Mendeley kontā klikšķina pogu “**+Add new**”, pēc tam “**Import library**” un tad izvēlas formātu kādā importēs lejupielādētās atsauces.

7. Mendeley rīkā iespējams arī meklēt un pievienot atsauces manuāli. Klikšķina pogu “+Add new”, pēc tam “Add entry manually”. Parādīsies logs, kurā var ierakstīt **ArXivID**, **DOI** vai **PMID** identifikatorus un pēc tiem atrast nepieciešamo atsauci. Ja tā tiks atrasta, tad lauki aizpildīsies automātiski. Pēc tam jāklikšķina “Add entry”. Bet var arī visus esošos laukus aizpildīt manuāli, izvēloties atsauces veidu.

The screenshot shows the Mendeley 'Add entry manually' dialog box. The interface includes a sidebar with navigation options like 'All References', 'Recently Added', and 'Collections'. The main area is titled 'Add entry manually' and contains several input fields. A red rectangular box highlights the 'Identifiers (ArXivID, DOI or PMID)' section, which contains a text input field with the DOI 'https://doi.org/10.1016/j.jdiacomp.2022.108266' and a 'Reset' button. Below this, a green checkmark indicates 'Metadata found. Forms were successfully populated'. Other fields include 'Reference Type' (set to 'Journal Article'), 'Title' (filled with 'Diabetes, sleep disorders and risk of depression - A Danish register-t'), 'Authors' (a list of names like 'Wium-Andersen, Ida Kim'), 'Journal' (filled with 'Journal of Diabetes and its Complications'), and 'Year' and 'Pages' fields. At the bottom, there are 'Add entry' and 'Cancel' buttons.

Mendeley rīka iespējas

The screenshot shows the Mendeley Reference Manager interface. The interface is divided into several sections:

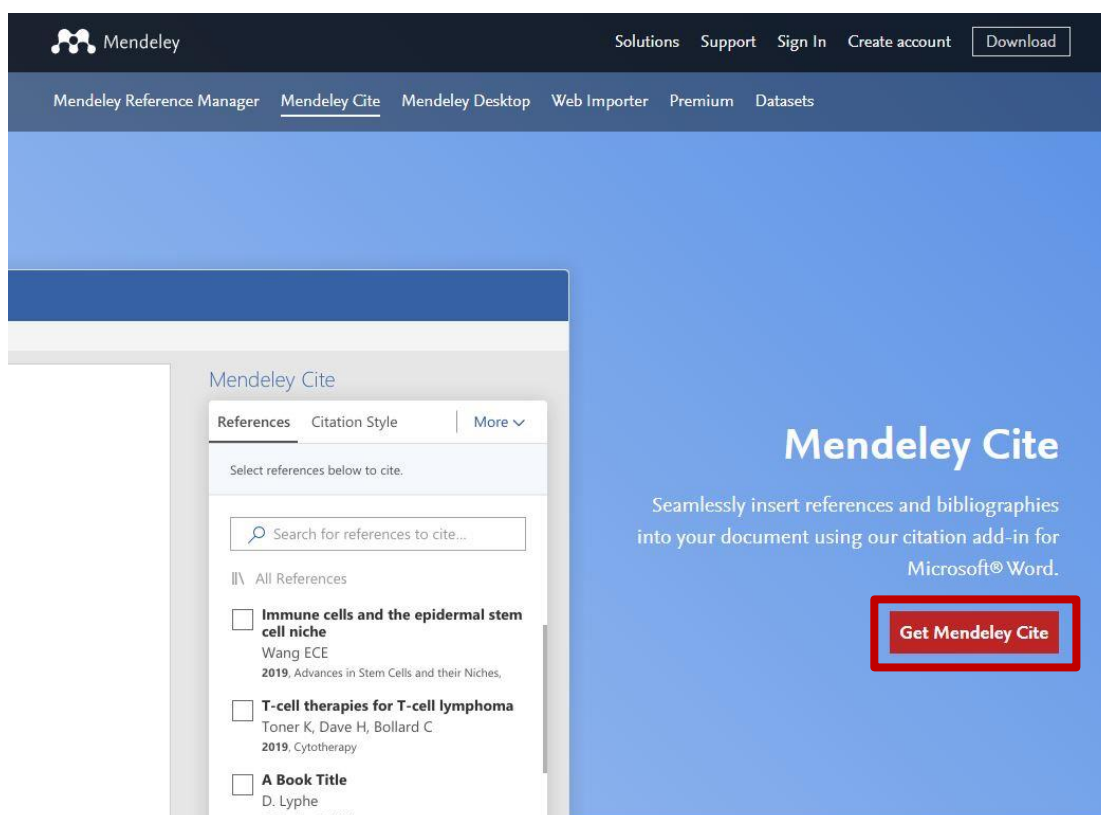

- 1.** "+Add new" button in the top left.
- 2.** "All References" tab in the left sidebar.
- 3.** "Smart Collections" section in the left sidebar, including "Recently Added", "Recently Read", "Favorites", and "My Publications".
- 4.** "Collections" section in the left sidebar, including "Neurology diseases of the nervous system", "Sleep disorders", "Social psychology", and "New Collection".
- 5.** "Groups" section in the left sidebar, including "Librarian", "RSU", and "New Group".
- 6.** Search bar and filters in the top right of the main area.
- 7.** The main table of references with columns for "AUTHORS", "YEAR", and "TITLE".
- 8.** Action panel at the bottom of the table with buttons for "Organize", "Mark as", "Export", and "Delete".
- 9.** "Info" panel on the right side, showing details for a selected reference, including "JOURNAL ARTICLE", "Sleep disorders during childhood: a practical review", and "ABSTRACT".
- 10.** "Notebook" tab in the top right.
- 11.** "Sync" button in the top right.
- 12.** "Profile" button in the top right.

1. "Add new" - pievienot jaunu atsauci.
2. "All References" - visas atsauces.
3. "Smart Collections" - automātiska bibliotēkas organizēšana.
4. "Collections" - tematiskā atsauču organizēšana.
5. "Groups" - savas veidotās grupas.
6. "Search" - meklēšana.
7. "Library table" - visas atsauces konkrētajā kolekcijā vai grupā.
8. "Action panel" - izvēlne, ko darīt ar konkrēto atsauci.
9. "Info panel" - metadati par atsauci.
10. "Notebook" - savas piezīmes.
11. "Sync" - automātiskā sinhronizācija.
12. "Profile" - lietotājs, iestatījumi un ielogošanās.

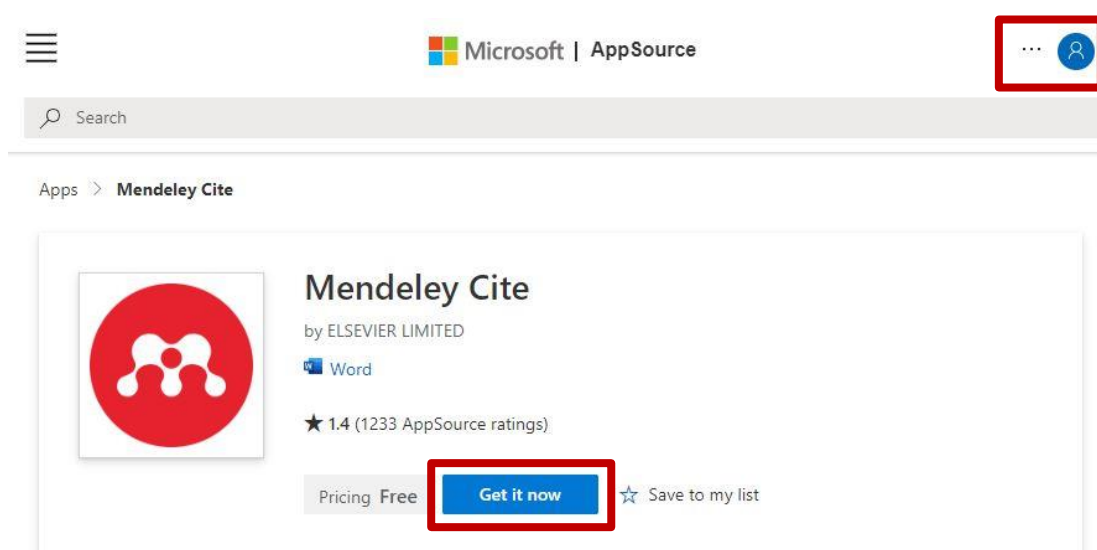

- Mendeley mājaslapā pie "Quick User Guide" ir 2021. gada instrukcija, kuru var izmantot, lai iepazītos ar atsauču rīka pamatprincipiem (https://p.widencdn.net/hcqiuv/RES_MRM_UGMendeley-Reference-Manager---New-User-Guide).
- Tāpat Mendeley mājaslapā ir "Help Guides", kuros tematiski ir sašķīrotas īsas instrukcijas, kā un ko veikt Mendeley rīkā un paplašinājumos (<https://www.mendeley.com/guides>).

11. Lai izveidotu bibliogrāfiju, novieto kursoru tur, kur jābūt bibliogrāfijai, tad “Mendeley Cite” no izvēlnes “More”, izvēlas “Insert Bibliography”. Bibliogrāfija automātiski pievienosies.
12. Mainot atsauču stilu tekstā, tas automātiski nomainīsies arī bibliogrāfijai.

The screenshot displays the Microsoft Word interface with the Mendeley Cite sidebar open. The sidebar is titled "Mendeley Cite" and has a menu with "References", "Citation Style", and "More". The "More" menu is expanded, showing "Insert Bibliography" and "Update From Library". A red circle highlights the "Insert Bibliography" option. A red arrow points from this option to a red-bordered box in the document containing a list of references. Another red arrow points from the "Insert Bibliography" option to the text "Izveidotā bibliogrāfija" (Generated bibliography) below the reference list. The reference list includes:

Mendeley Web Importer

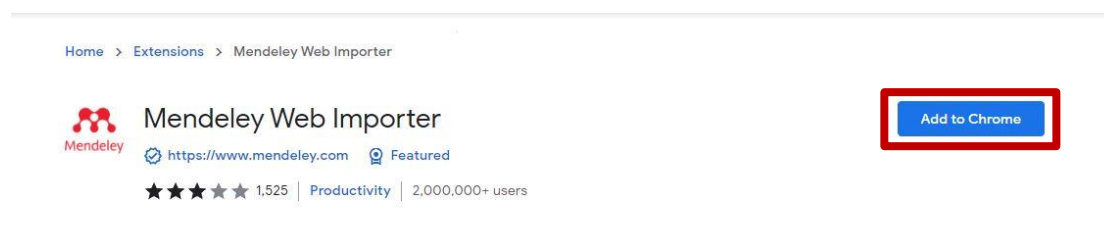

- Mendeley Web Importer ir paplašinājums, ar kura palīdzību var uzreiz saglabāt atsauces, ielādēt PDF dokumentu un to saglabāt savā lietotāja bibliotēkā. Tas pieejams visos interneta pārlūkos. Lai paplašinājumu pievienotu pārlūkā “Opera”, jāizmanto “**Chrome Web Store**” linku:

<https://chrome.google.com/webstore/detail/mendeley-web-importer/dagcmkpagjlhakfdhnbomgmjdpkdklff> .

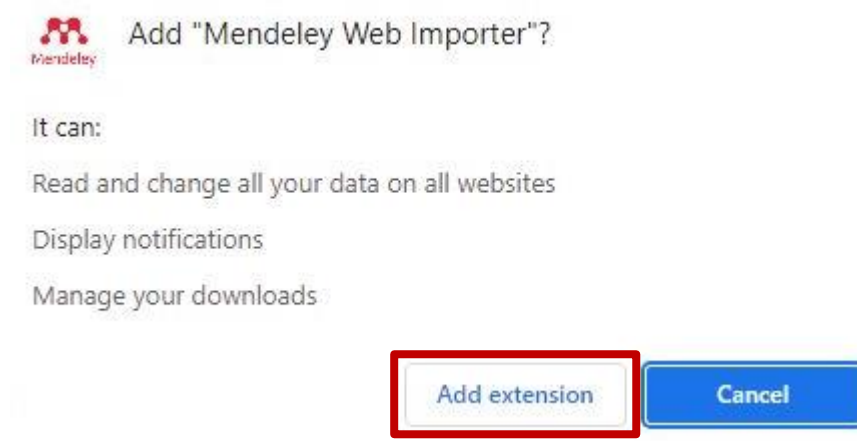

1. Atveriet saiti <https://www.mendeley.com/reference-management/web-importer>
2. Klikšķiniet “**Get Web Importer for Chrome**”.

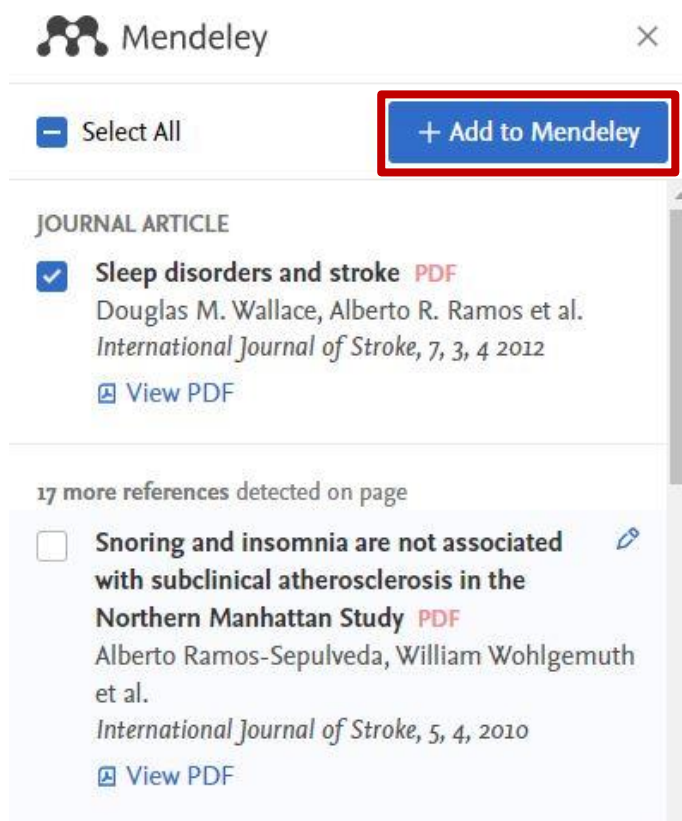

3. Pēc tam atvērsies jauna cilne, kurā jānoklikšķina “**Add to Chrome**”.

4. Pēc tam jāklikšķina “Add extension”.

5. Tagad meklējot nepieciešamos rakstus, Mendeley paplašinājums piedāvās uzreiz saglabāt atsauces ar pogu “+Add to Mendeley”, kuras pieejamas datubāzē vai mājaslapā, kuru esošajā brīdī skatāties, kā arī atvērt PDF dokumentu, ja tas būs pieejams, ar “View PDF” sarkano pogu.

Mendeley PDF dokumentā

- Ar Mendeley rīku ir ļoti ērti strādāt PDF dokumentos tiešsaistes versijā. Katrā raksta dokumentā var izcelt svarīgāko un pierakstīt komentārus, kuri automātiski sinhronizējas un ir pieejami pie katra ieraksta “**Annotations**” sadaļā.

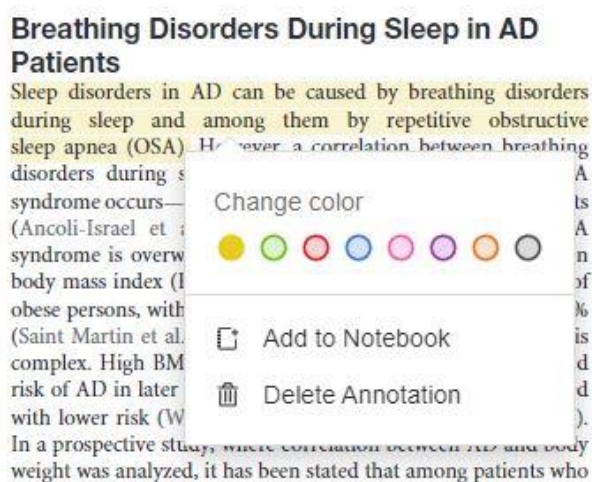

- Ar “**Highlight**” var izcelt nepieciešamo informāciju.

- Izceltā piezīme iekrāsosies noklusējuma krāsā.

- Piezīmi var rediģēt, mainot tās krāsu, kādā tā izcelta, ar “**Change color**”, pievienojot savām piezīmēm, ar “**Add to Notebook**” vai arī to izdzēšot, ar “**Delete Annotation**”.

4. Ar iespēju “Sticky Note” var pievienot komentāru.
